

LIGHTING THE WAY WITH INNOVATION

Since Electronic Controls, inception in 1983, we have been totally dedicated to the elevator industry. Through this dedication we originally became known as the National Leader in Elevator Circuit Board and Controller Support by offering sales, repairs and technical support. We continue to service thousands of part numbers, manufactured by major elevator companies, to include both current and obsolete circuit boards. Today, we pride ourselves in offering our own ECI America brand of technically advanced products, designed and manufactured by us here in America. Products include, CabLite® LED lighting, automatic lighting control, emergency lighting, modular drop ceilings, labor saving millennial LCD door control boards, residential closed loop operators and numerous forthcoming products that continue to strengthen our place within the elevator industry. Purchase with confidence, the ECI America brand signifies our commitment to technologically advanced, quality products made in America.

MerLite 2000 series of Emergency Lighting Battery Backup offers models to support commercially available 120VAC, 12VDC and 24VDC, luminaries at specified wattage requirements. All products may be viewed online at ECIAMERICA.com

MerLite 2000

Emergency Lighting Battery Backup Systems

Dedicated to a brighter, safer future

Achieve a new level of confidence in your building with powerful ECI America Emergency Elevator Lighting. Our technologically advanced MerLite 2000 lighting systems raise the industry standard for elevator passenger safety lighting, exceeding all AMSE and ANSI code requirements.

Emergency lighting you can See by.

The MerLite 2000 Series of emergency lighting battery backup for elevators, make it possible to select any number of specified light(s) or all the lights in the elevator, to operate in an emergency power outage. By utilizing the general operational lighting, the technically advanced MerLite offers greatly increased emergency light levels, boasting 10 times or more light than standalone or COP mounted devices. This provides light you can see by, for a safer, brighter and more comforting environment for trapped passengers in an emergency.

Architecturally Pleasing Emergency Lighting

Emergency lighting in an elevator is among a buildings most important safety feature. The MerLite 2000 series eliminates the use of intrusive, unattractive wall mount and COP emergency lights, allowing the emergency lighting to illuminate through the architecturally specified lighting designs, for an uncompromised cab interior.

Elevator Safety Lighting Engineered To Make Buildings Safer, Smarter & Brighter.

ECI America Optimizes New & Existing Elevator Lighting Technology

The MerLite 2000 Series of Emergency Lighting Battery Backup Systems offer universal acceptability for commonly marketed LED, Compact Florescent, Florescent, Halogen and Incandescent Lighting.

These universal emergency lighting systems provide standalone battery backup that does not rely on the electrical system of the building. They are always operational and ready for use.

MerLite Emergency Lighting Boldly Illuminates Elevator Cabs with Industry-Leading Performance

Elevators must be brightly illuminated at all times, Our CabLite® LED Lighting and MerLite 2000 emergency lighting product lines are manufactured specifically to meet elevator code requirements. Our LED lighting, emergency lighting and auto shutoff devices offer worldwide acceptability, making installation of ECI America MerLite 2000 system(s) seamless.
